#### **POLISH FOR STEEL AND ALLOY METAL SURFACES**

The only Italian company in the sector to have obtained ISO 9001 quality certification and, above all, the demanding ISO 14001 environmental certification. Thanks to the constant commitment of MA-FRA, products unique in their technical specifications have been developed that distinguish themselves in a constantly developing market and often anticipate new trends. An example of this success is Steel Bright, a polish for steel and alloy metal surfaces. Steel Bright is the leading product in the marine line and is a new polish specifically designed to clean, polish, renovate, remove small scratches and light oxidation. Steel Bright restores the original bright shine to all steel and alloy metal surfaces such as bitts, rails, ladders, brass and handles. Steel Bright provides effective protection against salt water, corrosion and UVA radiation.
